## TECHNICAL DATA SHEET

---

# Hortimed Humus Plant Biostimulant

---

### Technical description

The Hortimed Humus Plant Biostimulant is 100% natural and ecological plant biostimulant from Latvia lake peloids.

**Ingredients:** SAPROPEL (Organic rich sediment from freshwater bodies formed under exclusion of oxygen), potassium carbonate.

### Benefits of Hortimed Humus Plant Biostimulant

Increases plant growth and development by improving nutrient intake  
Protects plants from abiotic stress, and changing climate conditions  
Provides plants with readily available nutrients and necessary mineral

### Intended use of the biostimulant

Liquid plant biostimulant concentrate to stimulate vegetative mass growth and to increase the crop yield at the end of reproductive phase– more and better quality fruits. Application by means of foliar application and watering.

### Target crops

- Broad acre crops
- Woody perennials
- vegetables, berries, fruit trees

### Possible packaging sizes

- 10 ml sachets
- 20 ml sachets
- 500 ml HDPE bottles,
- 1,0 L co-extruded PE bottles,
- 5 L HDPE cans,
- 20 L HDPE cans
- bulk IBC 1000 L containers
