

### PRODUCT CHARACTERISTICS

CROSS 300 SL is a selective systemic herbicide, rapidly absorbed by the leaves and roots, translocated both acropetally and basipetally throughout the plant.

### DIRECTION OF USE

CROSS 300 SL is an effective herbicide for post-emergence control of annual and perennial broad-leaved weeds in sugarcane, forestry, woody vines and non crop land. It is not recommended to use Cross 300 SL in the control of annual weeds for food crop production

### Dose:

Crops	RATE /arp.	RATE /ha
Perennial broad leaved weeds	2 L	4 L
Bushes, Trees, Woody Plants	3 L	6 L
Mature Plants	4 L	8 L

Mixing instruction: Add required amount of product with water and transfer to Sprayer.

To note:

CROSS 320 SL can also be applied undiluted or in a 1/1 dilution of water or gas oil for tree injection, frill girdling or cut stump treatment. This product should not be applied near water used for irrigation as it is highly mobile and persistent.

**No. of application: 1**

**Re-entry period: 24 hours**

**Compatible with other herbicide**
